### Travels in Umbria

**Jacky Storey** will talk about her visits to Umbria, the 'green heart' of Italy. Best known for beautifully preserved hill-top villages amidst dense forests and glorious countryside, it's a place where Romans and Renaissance artists have left their imprint and where it's possible to walk part of St Francis' Way.

**Thursday 22 September 2022**

**at 7.30pm**

**The Assembly Room, Council House, North Street, Chichester**

**Members £10.00 Non members £12.00**

### Guglielmo Marconi

**Peter Turner** will give us a fascinating insight into some of Marconi's notable achievements which remain with us today.....

Born just outside Bologna, Marconi developed the first practical wireless system in Italy, then further afield in England, Ireland and Canada.

The talk involves a simple GCSE lesson in physics. It will also include some of the important happenings in the history of Marconi wireless and in his life, including his association with Mussolini and Fascism.

Bruschette and a glass of wine will be served after the presentations
